1. Purpose

To ensure prompt recognition and intervention for patients showing clinical deterioration using standardized Early Warning Scoring systems (EWS) across various departments.

2. Scope

Applicable to all inpatient, ICU, emergency, pediatric, obstetric, and neonatal care areas of Hope Hospital.

3. Definitions

MEWS: Modified Early Warning Score (adults)
PEWS: Pediatric Early Warning Score
MEOWS: Modified Early Obstetric Warning Score
NEWS: Neonatal Early Warning Signs

4. Policy Statements

EWS charts shall be displayed in all wards, ICU, and maternity units.
All nurses and doctors will use EWS tools during patient rounds.
Any score ≥ 5 will trigger immediate senior clinician review.

5. Implementation Guidelines

5.1 MEWS (for adult patients):

Parameter	3	2	1	0	1	2	3
RR (breathes/min)	<9	9-14	15	21-29	30		
HR (breathes/min)	<40	40-50	51	101-110	110		
SBP (mmHg)	<70	71-80	81	101-199	200		
Temp	<35	35-38.4	≥ 38.5				
AVPU Score	Alert	Reacts	Pain	Unresponsive			

5.2 PEWS, MEOWS & NEWS

Separate charts are attached in annexures for department use.

6. Roles & Responsibilities

Nursing Staff: Fill EWS chart every 6 hours or as clinically indicated.
Duty Doctors: Review EWS ≥ 3 urgently.
QA Team: Conduct monthly audits on compliance.

7. Training & Monitoring

Mandatory training for all staff (monthly refresher + induction)
Maintain attendance, pre-post test, and photo evidence of training
Conduct 3 sample MEWS audit records weekly.
