A. Purpose: To provide guideline instruction for facilitating referral of patient.

B. Scope: Hospital wide

C. Policy:

1. Decision to refer a patient for consultation to other clinical specialty will be taken by the primary treating consultant of the patient.

2. The primary treating consultant of the patient will indicate the same in writing in the patient's medical records.

3. A note in patients' medical record containing details of the patient's diagnosis, treatment given, reason for referral etc is written by the referring consultant and the same is attached in the patient's medical records.

4. In case the required medical specialty is not available in the hospital the treating consultant will refer the patient to the concerned specialty in the Medical College and Hospital or the nearest multispeciality hospital.

5. The consultant referring the patient to the identified external healthcare institution will fill a referral slip indicating the diagnosis , treatment given , condition of the patient , investigations/procedures if any undertaken by the patient etc.

6. In case of discrepancy in referring the patient either to departments/specialties within the hospital or to the identified external healthcare institutions, the treating consultant will consult the Medical superintendent for clarification.
