J. Support services:

a. Surgical/ Anesthetic services
b. Infection control
c. Pharmacy
d. Physiotherapy
e. Dietetic services
f. Technical equipment support services

K. Inpatient Admission:

The patient requiring in-patient care would be suggested so in writing by the treating consultant. No patient admitted in IPD facilities without written request of treating consultant, on duty the staff nurse receives the patient.
Patient is directly taken to the emergency department of the female wing , the on duty OBS and Gynae consultant will undertake the initial treatment and the senior consultant on call is immediately informed (if required). The senior consultant on call will reach the hospital within a maximum time gap of 20 minutes.
On arrival the senior consultant examines the patient and initiates the treatment. Incase the patient is to be admitted , the treating doctor on call indicates the same in writing. The patient is admitted as per the hospital policy and treatment is initiated.

L. Referral of patient to other specialty:

If the primary treating consultant of the patient feels the need to refer the patient to consultants of some other specialty, a referral slip is filled by the primary treating consultant of the patient with details relating to the patients complain, diagnosis and treatment initiated.
The referral slip is attaché with the patient case record for the perusal of the referred consultant.

M. Transfer of patient to other hospital:

If the patient cannot be treated in the hospital due to non availability of the required medical care e.g. dedicated intensive unit facilities, the patient will be transferred to Medical College and Hospital as per the Transfer Policy of the hospital.
